

Inter.txt Press: Pocket Essays

The tl;dr is that I'm looking for folks who might be interested in publishing very short essays as a part of a one-sheet zine series! Feel free to share this open call with your friends and peers.

Inter.txt Press is a micro publishing practice by Phoebe Pan, focusing on zines, print ephemera, and textual worldmaking. It is currently in a soft launch stage with the goal of slow emergence over the next few years.

OPEN CALL: Currently seeking **mini essays** that engage with topics of gender, queerness, technology, radical care, publishing, the internet, games, craft, music, and/or the environment. I'm very open to other topics as well, if you want to make a brief pitch!

Guidelines:

- ❖ **1,000 to 1,200 words.** That's around 2 pages single-spaced in 12pt Times New Roman font. There'll be some word limit flexibility with font sizes and line height, but I've found this range to be a good average for the overall shape of the zine.
- ❖ **Text only.** Certain exceptions: if you're writing about a piece of visual art, you can have a slightly shorter essay with one image or graphic on the last fold of the zine. Please try to avoid unusual formatting. And no links! The piece should be 99% analog – you can of course include your socials or email at the end.
- ❖ **Nonfiction only**, with certain allowances for experiments in genre (your "essay" can be a guise for a manifesto, a guide, a review, and so on).
- ❖ **Titles should be relatively short**, around 10-20 characters. You may include a subtitle if you wish (see the "Girlhood 2" example below).
- ❖ **Please don't send previously published work**, unless you have a specific reason for wanting to publish it in a pocket zine format!
- ❖ If you've read all this and are interested in submitting, please send a Word doc or Google doc of your piece to intertxtpress@gmail.com, with the email title: "PE Submission - [Your Name]."

What you'll get from me:

- Free printing & layout services! Though please note that even with variation in things like font choice or paper color, the layout of each zine will largely remain the same, due to this being a ~series~.
- Light editing & feedback on your piece, if you'd like.
- (Very) light publicity & distribution. I'm famously not a marketing person but I will sell copies of your zine at future zine fairs that I table at, and I'll talk about it on my socials & in my friend circles!

Publishing details for contributors:

- ★ Pocket essays will appear solely in print form, and will not be published digitally.
- ★ When selling your pocket essay online or at fairs, I will price each copy at \$2. You will receive 100% of the sales revenue from sold copies.
- ★ Each pocket essay will have a limited print run of somewhere between 20 to 40 copies, depending on your preference, with the possibility of printing additional copies for an end-of-year “box set” (if I publish more than 5 pocket essays in 2026).
- ★ Out of that limited print run, I'll send 10 of the copies directly to you, of which you can price and distribute however you see fit.

QUESTIONS YOU MIGHT ASK

What is a pocket essay?

- Pocket essays are short and thought-provoking pieces of writing.
- Pocket essays are ginger chews: tiny bursts of flavor that settle your soul.
- Pocket essays are hand warmers for your mind.
- Pocket essays are conversation starters (& fire starters, in an emergency).
- Pocket essays are amulets and spell components for working great magic.
- Pocket essays are bookmarks and dog-ears for further research.
- Pocket essays are fashion statements: pocket squares with something to say.
- Pocket essays are talismans kept close to your chest.
- There is no topic too small or too big for a pocket essay to approach!

What's the idea behind this series?

I've been interested in publishing a "series of things" for a while, but I have been coming up against the issue of figuring out how that can happen in a sustainable way – as in, Inter.txt is a micropress and I don't have buckets of free time to be making whole books or even booklets. A few months ago, I was looking at [Athena Tacha's accordion-fold pocket books](#), and I thought, wait a minute! This format is neat! It's cheap to print and easy to assemble; it's accessible; it emphasizes the text itself; it looks nice as a collection.

One of my long-term goals for Inter.txt is to collaborate with more folks and share the work of friends and peers. I'd love to publish around 5 or 6 pocket essays in 2026, if this series gathers enough interest!

Who is this project for?

Here's the truth of it: Inter.txt is a micropress that's still in a soft launch stage, and my goal for the next few years is to move slowly and deliberately through the indie publishing world, rather than try to broaden my audience as quickly as possible. If you're an emerging writer looking to rapidly expand your reach and audience, I can recommend a handful of other journals and magazines that would be much better suited to your goals!

If, on the other hand, you're willing to experiment alongside me and want to dip your toes into the world of zines – a niche world with a relatively small audience, I might add – and want to make something for the sake of making it, then this series might be a good fit for your work.

Why is this a print-only series?

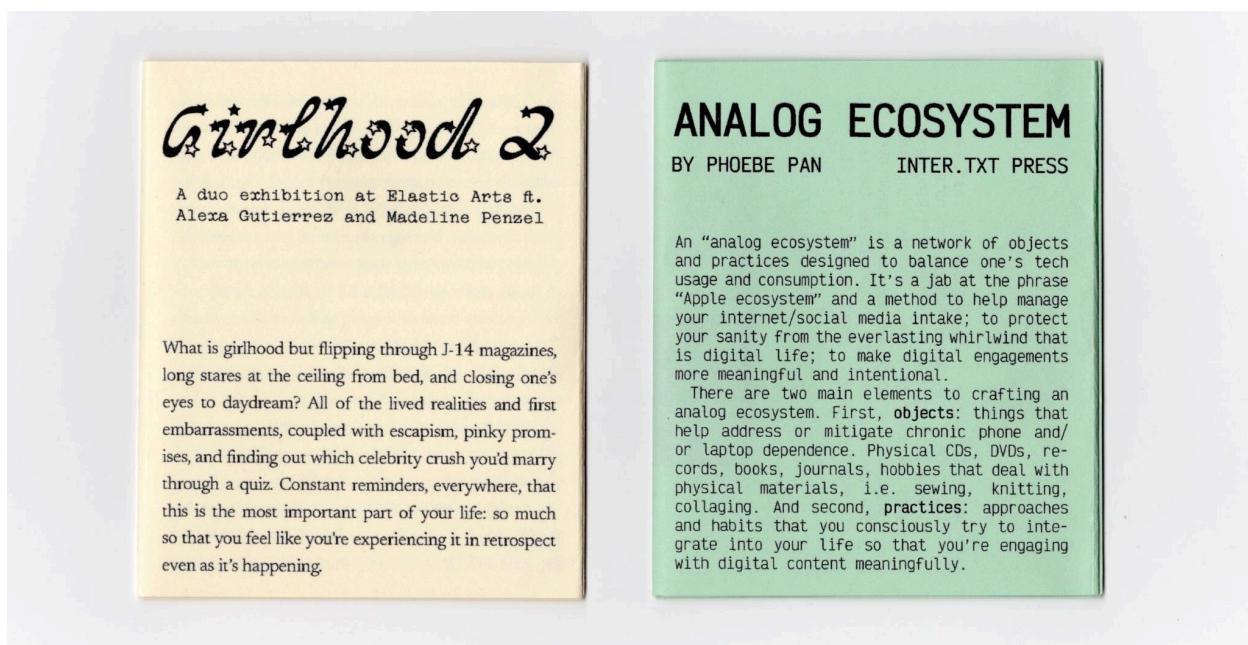

Because I love print media. I want this series to be a celebration of the single-sheet zine format and all the wonders it can contain. Print is tactile, durable, giftable. It will survive a power outage. It's clandestine and can't be easily surveilled. It can't be gobbled up by AI!

Why are you doing this for free??

I'm essentially treating the first year of this project as a learning period, where I get to hone my printing practice and experiment and make mistakes. I'm not doing this for the money – zines have never been profitable, and probably never will be. It's much more important for me to make lasting relationships with people whose work I want to share with the world. This isn't to erase the labor that goes into printing and publishing, but I'm cognizant of the fact that these are... single-page zines, as opposed to chapbooks or even full books.

What format will the pocket essay appear in?

A subtle spin on the classic single-sheet, eight-fold zine! Essays will be printed on pastel colored sheets of legal sized paper. Here is what the form factor looks like (3 inches wide, 4.25 inches tall):

And this is what it looks like unfolded:

Individuals with dyslexia often have difficulty with reading, writing, and spelling. They may also have trouble with math, memory, and organization. Dyslexia is a specific learning disability that affects the way a person processes language. It is not a sign of low intelligence or a lack of effort. Dyslexia is a brain-based disorder that can be treated with early intervention and support. If you suspect your child has dyslexia, it's important to seek help from a qualified professional. Early intervention can make a big difference in how well a child learns to read and write. Dyslexia is a lifelong condition, but with the right support, individuals with dyslexia can lead successful lives.

15. A method for extracting information from a complex structure, such as a document, is to use a parser to analyze the structure and extract the desired information. This is typically done by defining a grammar that describes the structure of the document, and then using a parser to read the document and extract the information according to the grammar. The extracted information can then be used for various purposes, such as searching, indexing, or summarizing the document. There are many different types of parsers, such as regular expression parsers, finite state machines, and context-free grammars. The choice of parser depends on the specific requirements of the application. For example, if the document is a plain text file, a regular expression parser might be sufficient. However, if the document is a structured document, such as an XML file, a context-free grammar parser might be more appropriate. In general, the goal of a parser is to extract the meaningful information from a document and make it available for further processing or analysis.

problems start with identifying what you want to achieve. Once you have a clear idea of your goals, you can start to break them down into smaller, more manageable steps. This is where the concept of 'small steps' comes in. Instead of trying to tackle a large task all at once, it's better to break it down into smaller, more manageable pieces. For example, if you want to learn a new language, instead of trying to memorize every word in the dictionary, start by learning a few basic words and phrases. As you progress, gradually add more words and phrases to your vocabulary. This approach makes the task feel less overwhelming and more achievable.

If you're interested in thinking critically about new technologies, check out Low Tech Magazine [lowtechmagazine.com], a digital publication that runs on a solar powered server and publishes a lot of great content on low tech approaches to modern conundrums.

ANALOG ECOSYSTEM

BY PHOEBE PAN INTER.TEXT PRESS

An “analog ecosystem” is a network of objects and practices designed to balance one’s tech usage and consumption. It’s a jab at the phrase “Apple ecosystem” and a method to help manage your Internet/social media intake; to protect your sanity from the everlasting whirlwind that is digital life; to make digital engagements more meaningful and intentional.

analog ecosystem. First, **objects**: things that help address or mitigate chronic phone and/or laptop dependence. Physical CDs, DVDs, records, books, journals, hobbies that deal with physical materials, i.e. sewing, knitting, collaging. And second, **practices**: approaches and habits that you consciously try to integrate into your life so that you're engaging with digital content meaningfully.

PLATFORMS

Avoid Spotify, Apple Music, YouTube Music, Qobuz, and Tidal are slightly better alternatives. Soundcloud, Bandcamp, and radio (online/local) are my preferred platforms. NTS is great! Follow college radio stations if you're craving new and zany stuff.

Make use of your local library. You can find

Make use of your local library. You can find so much physical media and even rent CD/DVD players at certain branches. Make use of your library's digital platforms as well: Libby is great for audiobooks and ebooks; MUSICat for streaming alternatives; Kanopy for films, and PBS for TV shows.

If you're still craving boutique streaming services, go for ones that actually care about their creators: Dropout (for comedy and D&D); Criterion Channel (for the film buffs); Nebula (creator-owned).

Social media alternatives: Make a blog! Join or start a local book/film club! Exchange music with friends! Start a newsletter! Sign up for Goodreads, Letterboxd, or Musicboard instead of Twitter or Facebook!

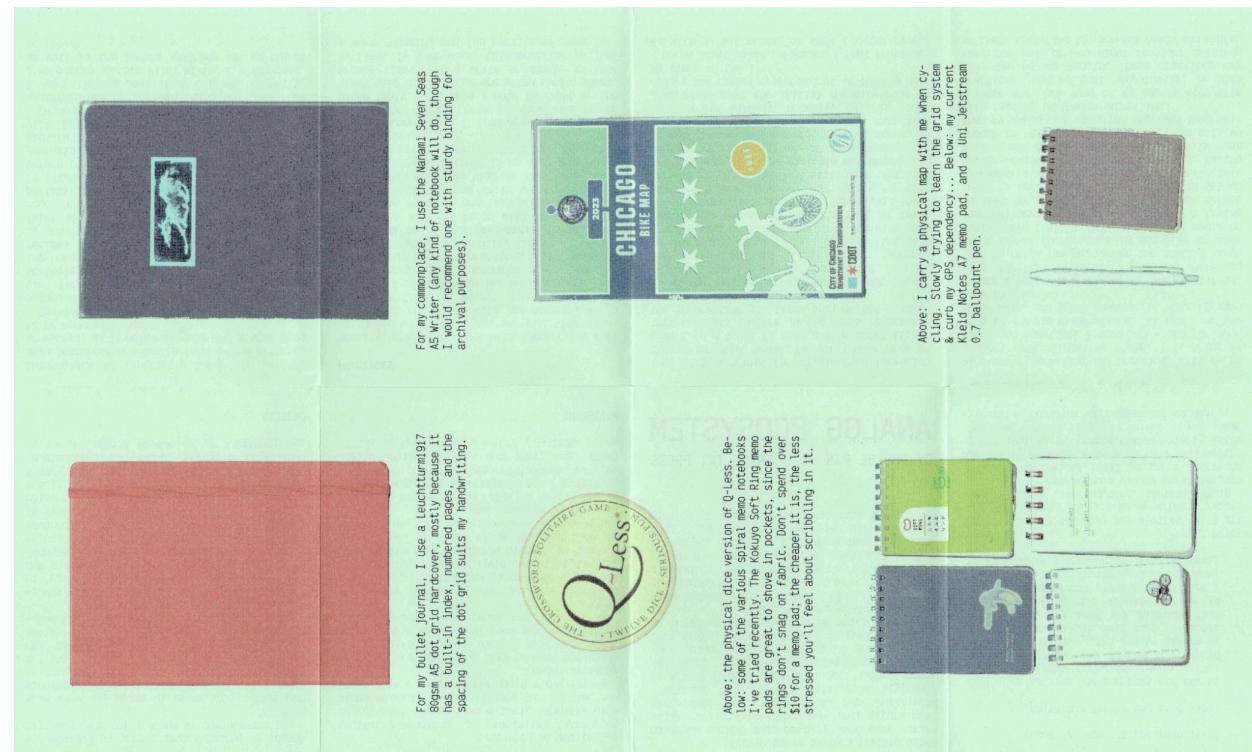

OBJECTS

Smartphone users have another ecosystem are my notebooks, pens, and a small memo pad. This might seem like a lot to keep track of, but in practice it's a lightweight system, especially since I'm often only carrying or using one or two notebooks at a time. Each notebook has a specific purpose and isn't bloated with extra functions. You'll find this in a lot of other "low tech" setups, as well; people who carry multiple tools and devices, such as an mp3 player and a camera, to split up the different functions that a smartphone would usually consolidate.

The bullet journal is where I set up my yearly, monthly, weekly, and daily schedule, along with various task lists and habit trackers. You can use preprinted planners, of course, but I'm a tinkerer at heart, so a bullet journal is the perfect way to fine-tune different layouts and setups from month to month (or even week to week).

The commonplace is where I jot down specific quotes or passages that I want to remember. A

Pretty neat! All the text fits on a single legal sized page (8.5" x 14"). For this particular zine, I also printed a ***secret spread*** on the reverse side:

Having those extra three inches of space really makes all the difference, and, in my opinion, transforms the traditional 8-fold zine into something much more attractive and readable. I've tried 11×17 paper and found that it's just a bit **too** large to be a comfortable pocket size.

If you have any other questions, please reach out by email!

Many thanks,
Phoebe
